

# Addition with Regrouping

CA Standards  
KEY NS 2.1, MR 2.3

Use the table to solve the problems.

Threatened and Endangered Animals in the United States		
Animal Group	Number Threatened	Number Endangered
Mammals	9	65
Birds	14	78
Reptiles	22	14
Amphibians	9	12
Fish	44	71
Clams	8	62
Snails	11	21
Insects	9	35
Arachnids	0	12
Crustaceans	3	18

1. How many mammals in the United States are classified as threatened or endangered?

\_\_\_\_\_

3. Clams, snails, and crustaceans all have shells. One of these groups of animals has more than 50 endangered or threatened species in all. Which group is it?

\_\_\_\_\_

5. Arachnids include spiders, mites, and ticks. Arachnids are different from insects because they have 8 legs. But Vito calls all the animals in both groups “bugs.” How many threatened or endangered animals are in Vito’s “bug” group?

\_\_\_\_\_

2. How many threatened or endangered insects are there in the United States?

\_\_\_\_\_

4. Which group has the most threatened or endangered animals?

\_\_\_\_\_

6. Clams and fish have 0 feet. Snails have 1 foot. Birds have 2 feet. Which group has the most endangered or threatened animals: clams and fish, snails, or birds?

\_\_\_\_\_
