

# Practice Dividing by 7

CA Standard  
**KEY** NS 2.3

For each dance style, the Step-Up Dance School offers the same number of classes each day. Use the table to solve each problem. (1 week = 7 days)

1. How many tap dance classes are taught each day at the school?

\_\_\_\_\_

2. Brenda wants to take a ballroom dance class on Tuesday. How many classes can she choose from?

\_\_\_\_\_

3. How many dance styles have an even number of classes each day?

\_\_\_\_\_

4. Flamenco, salsa, and tango are all Spanish dances. Amanda says that Step-Up Dance School offers exactly 21 Spanish dance classes each day. Is she correct?

\_\_\_\_\_

5. On Friday, Cara took all of the classes offered in two different styles. Oscar took all of the swing classes offered that day. They both took the same number of classes. Which classes did Cara take?

\_\_\_\_\_

Step-Up Dance School	
Dance Style	Number of Classes Each Week
Ballet	70
Salsa	56
Tango	42
Ballroom	63
Tap	28
Flamenco	21
Modern	35
Swing	49
