

# Choose a Graph to Display Data

CA Standards  
**KEY** SDAP 1.3, MR 1.0

Write *line plot, tally chart, pictograph, or bar graph* to tell the best kind of graph to use. (You can choose more than one kind of graph as an answer.)

1. You want to show the results of a survey about people's favorite ice cream flavor.

---

---

---

3. You want to show how many times members of the softball team from another school struck out.

---

---

5. You want to show the results of a survey about your friends' hobbies. Which kind of graph is **not** a good choice?

---

---

2. You want to compare the lengths of the world's 10 longest rivers.

---

---

4. You want to compare the kinds of pets your classmates have. You love to draw!

---

---

6. The numbers you want to show on a graph are 5, 11, 33, 40, and 57. Which is the better graph to use, bar graph or pictograph?

---

---
