

# Hands On: Equal Groups

CA Standard  
NS 2.0

Use counters to solve the problems.

1. Hector has 39 stickers. He placed them into 6 equal piles. How many stickers did he have left?

\_\_\_\_\_

3. Melissa has 38 dyed eggs. She wants to store them in cartons of 12 eggs each. How many cartons will be full? How many eggs will be in the carton that is not full?

\_\_\_\_\_

5. Tyrone used counters to model the division problem:  $37 \div 5$ . He came up with the quotient of 6 with 7 left over. What's wrong with Tyrone's answer?

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

2. Simone has 44 buttons in her collection. She lined them up into 8 equal rows. How many buttons did she have left?

\_\_\_\_\_

4. Liam organized 28 video games in boxes. He put 5 games in each box. How many full boxes does he have? How many video games are in the box that is not full?

\_\_\_\_\_

6. Tara divided by 5 and got the quotient was 6 with 2 left over, and he was correct. What is the dividend of the problem?
