

Total Cost and Unit Cost

CA Standards
MR 2.4, NS 2.7

Solve. Explain why your answer makes sense.

1. The total cost of 5 boxes of rubber bands is \$15. Each box of rubber bands is the same price. What is the unit cost?

3. The total cost of 4 staplers is \$36. Each stapler is the same price. What is the unit cost?

5. The total cost of 12 reams of paper is \$30. Each ream of paper is the same price. What is the unit cost?

2. One package of pencils costs \$3. Two packages of pencils cost \$6. Three packages of pencils cost \$9. If the cost increase remains the same, how much would 4 packages cost?

4. One package of 5 notebooks costs \$8. Two packages cost \$16. Three packages cost \$24. If the cost increase of each package of 5 notebooks remains the same, how much would 4 packages cost?

6. One ballpoint pen costs \$2. A package of two ballpoint pens costs \$3. A package of four ballpoint pens costs \$5. If the cost increase remains the same, how much would a package of 8 ballpoint pens cost?
