

Addition Properties

CA Standards
KEY NS 3.1, AF 1.0

Find the number that makes each number sentence true. Tell which property of addition you used to find each answer.

1. Which number completes the number sentence $\underline{\quad} + 58 = 58$?

2. Which number completes the number sentence $(9 + 1) + 49 = 9 + (1 + \underline{\quad})$?

3. Which number completes the number sentence $26 + 37 = \underline{\quad} + 26$?

4. Which number completes the number sentence $294 + 0 = \underline{\quad}$?

5. Which number completes the number sentence $(18 + 52) + 28 = \underline{\quad} + (52 + 28)$?

6. Which number completes the number sentence $283 + 917 = 917 + \underline{\quad}$?
