

Patterns in Multiplication and Division

CA Standards
KEY NS 3.0, MR 2.3

Use a multiplication table to solve.

1. Find the number 4 three times in the table. Write multiplication sentences and division sentences for each 4.

3. Find the number 16 three times in the table. Write multiplication sentences and division sentences for each 16.

5. Name five numbers that are found only once in the table.

2. Find the number 9 three times in the table. Write multiplication sentences and division sentences for each 9.

4. Find the number 36 in the table. Write multiplication sentences and division sentences for each 36.

6. What type of numbers is found an odd number of times in the table?
