Solve.

1. Aimee started plotting the point $(1, 2)$ by moving 1 unit to the right of $(0, 0)$. What does she need to do next in order to get to $(1, 2)$?

2. Ahn-Lee plotted the points $(3, 3)$ and $(3, 7)$. If she connects the points, what type of line will she form, vertical, horizontal or neither? Explain.

3. Nick plotted the point $(2, 4)$ and wants to plot another point to draw a horizontal line. Write one possible ordered pair for the other point he can plot.

4. Marlon plotted the point $(1, 5)$ and wants to plot another point to draw a vertical line. Write one possible ordered pair for the other point he can plot.

5. Davita plotted the point $(5, 8)$ by moving to the right 8 units and up 5 units. What did she do wrong?

6. Ben found one point on a horizontal line to be $(4, 7)$. What are the coordinates of another point on the line?
