Problem Solving: Guess and Check

Delaney spends \$5.85 for two different books.

Which two books does she buy?

Book Prices	
All About Whales	\$2.20
At the Ocean	\$3.50
Sea Birds	\$2.35

UNDERSTAND

What do you know?

PLAN

I can make a guess and choose two different book prices.

Which two prices should I try?

How can I check my guess?

SOLVE

Add to check.

Do I need to try another guess?

Delaney buys the books that cost _____ and _____.

LOOK BACK

How do you know that my answer is correct?
