

# Divide Money

Divide. Check your answers.

$$\begin{array}{r}
 \$2.78 \\
 3 \overline{) \$8.34} \\
 \underline{-6} \phantom{0} \phantom{0} \phantom{0} \\
 23 \phantom{0} \phantom{0} \phantom{0} \\
 \underline{-21} \phantom{0} \phantom{0} \phantom{0} \\
 24 \phantom{0} \phantom{0} \phantom{0} \\
 \underline{-24} \phantom{0} \phantom{0} \phantom{0} \\
 0
 \end{array}$$

**Remember the steps:**

- Divide as you do with whole numbers.
- Place the dollar sign and the decimal point in the quotient.

1.  $2 \overline{) \$5.12}$

2.  $3 \overline{) \$6.51}$

3.  $5 \overline{) \$6.45}$

4.  $3 \overline{) \$5.13}$

5.  $4 \overline{) \$6.48}$

6.  $7 \overline{) \$9.38}$

7.  $3 \overline{) \$1.65}$

8.  $6 \overline{) \$5.88}$

9.  $3 \overline{) \$4.26}$

10.  $2 \overline{) \$8.24}$

11.  $5 \overline{) \$95}$

12.  $4 \overline{) \$7.24}$

13.  $\$5.08 \div 4$   
\_\_\_\_\_

14.  $\$1.83 \div 3$   
\_\_\_\_\_

15.  $\$2.94 \div 2$   
\_\_\_\_\_

16.  $\$5.82 \div 3$   
\_\_\_\_\_

## Problem Solving

17. Ramon bought 4 glasses of lemonade for his family. He paid \$3.56 for all 4 glasses. What was the price for one glass of lemonade?
