

# Problem-Solving Strategy:

## Solve a Simpler Problem

A.J. plays baseball. There are 7 teams in his league. For the baseball season, each team plays each of the other teams twice. How many games are in a season?

**UNDERSTAND**

1. What information is given in the problem? What do you know?

---

---

**PLAN**

2. How can you solve the problem?

---

---

**SOLVE**

3. How many games would be played if there were 2 teams? 3 teams? 4 teams? 5 teams?

---

---

4. Continue the pattern. How many games are in a season if there are 7 teams?

---

**LOOK BACK**

5. **Write About It** How did solving the simpler problem help you find the answer?
