

Problem-Solving Decision: Multistep Problems

Problem Mrs. Valdez is in charge of the decorations for the school homecoming dance. She bought 6 bags of balloons. Each bag had 25 balloons. She fills all the balloons and separates them into equal bunches. She ties a bunch at each of 30 tables. How many balloons are in each bunch?

1. What do you know?

2. What steps do I need to solve the problem?

3. How many balloons are in each bunch? Show your work.

4. **Write About It** How can you check your answer?
