

Problem-Solving Decision: Too Much or Too Little Information

Problem Beverly sold tickets to the school play. She sold 28 tickets and collected \$140. Jeff sold twice as many tickets as Beverly. What was the price of each ticket?

UNDERSTAND

1. What information do you need to solve the problem?

PLAN

2. How will you solve the problem?

SOLVE

3. Do you have enough information to solve the problem? If so, solve and explain your steps. If not, what information do you need?

LOOK BACK

4. **Write About It** How can you tell if you have too much or too little information?
