

Problem-Solving Application:

Interpret a Line Graph

Problem In Mrs. Gregory’s science class, the students recorded the temperature throughout the day on Monday. The line graph shows the temperatures they recorded. Was it colder at the start of the day or at the end of the day?

Temperatures on Monday

UNDERSTAND

1. What does the graph show you?

PLAN

2. How can you use the line graph to get the information you need?

SOLVE

3. Which temperature is lower, Point A or Point G?

4. Was it colder at the start of the day or at the end of the day?

LOOK BACK

5. How can you be sure your answer is reasonable?
