

## Decide and Divide Table

Directions: Use estimation to decide which numbers from column A and column B you can divide to get the highest quotient. Each number may be used only once.

<b>A</b>			<b>B</b>		
72	38	41	417	828	207
19	66	96	675	919	341
23	87	52	550	178	723
18	29	43	143	385	649
57	65	97	270	425	782
76	84	31	878	995	516
