

## Guess and Check

Friends put their shells into these pails. Which two friends together have 60 shells?

**UNDERSTAND**

What do I know?

Do I need to know how many shells are in all 4 pails?

**PLAN**

Zero is in the ones place of 60. I will find the pairs of numbers that make a zero in the ones place.

**SOLVE**

I will add.

**LOOK BACK**

How do I know that my answer is correct?
