Answer the questions. Solve the problem.

The Nature Club goes on a bird-watching walk. The table shows how many of each kind of bird the club saw. How many more wrens did the club see than robins and bluebirds put together? _____ more wrens

Birds Seen	How Many
Robins	17
Cardinals	13
Wrens	27
Bluebirds	8

UNDERSTAND

What do I know?

What do I need to find out?

PLAN

I will find out how many robins and bluebirds there are together.

Will I add or subtract?

SOLVE

I will subtract the sum I got from the number of wrens.
