

## Act It Out With Models

Roberto has 1 quarter, 2 dimes, 1 nickel, and 3 pennies. Does he have enough money to buy a wind-up monkey?

### UNDERSTAND

What do I know?

What do I need to find out?

### PLAN

The wind-up monkey costs 60¢. I need to find the value of Roberto's coins.

How can I use coins to act out the problem?

### SOLVE

I'll start with the largest coin and count on. Then I'll compare the value of the coins to the cost of the wind-up monkey.

### LOOK BACK

Does my answer make sense?
