# Problem Solving

## Guess and Check

Delaney spends \$5.85 for two different books.  
Which two books does she buy?

Book Prices	
All About Whales	\$2.20
At the Ocean	\$3.50
Sea Birds	\$2.35

**UNDERSTAND**

What do you know?

**PLAN**

I can make a guess and choose two different book prices.

Which two prices should I try?

How can I check my guess?

**SOLVE**

Add to check.

Do I need to try another guess?

Delaney buys the books that cost \_\_\_\_\_ and \_\_\_\_\_.

**LOOK BACK**

How do you know that my answer is correct?
