

Use Plant Models

Steps

- 1. Observe** Look closely at plant pictures. Think about how the plant grows.
- 2. Use Models** Order the pictures to show how the plant starts, grows, and dies.
- 3.** On a separate sheet of paper, make a list to show five steps in this plant's life.

Think and Share

1. What is the first step of this plant's life?

Name _____

2. Describe how the plant changes through its life.

Investigate More!

Experiment Do all plants grow at the same speed? Plant two kinds of seeds at the same time. See which one grows the fastest.
